

Zurich Wealth Builder IUL™

US Equity Triple Index

In an accumulation IUL, diversification can help optimize performance. Zurich's US Equity Triple Index Account provides diversification with the added benefit of overweighting.

US Equity Triple Index Interest Account

S&P 500® ¹ Composite Stock Index	500 largest U.S. publicly traded companies
NASDAQ-100 INDEX® ²	100 largest most actively traded U.S. non-financial companies listed on Nasdaq stock exchange
Russell 2000 Stock Index® ³	2,000 small cap companies

How does it work?

Each policy year, we'll calculate the growth of each of the three indices. The top performer gets 70% of the weighting, the second best gets 30%, and the worst gets 0%. Then we apply the growth cap and the guaranteed bonus to interest credited in the prior year. Let's look at an example.

Measure 1 Yr Growth:

- Nasdaq-100 INDEX®: 35.4%
- S&P 500®: 9.4%
- Russell 2000 Stock Index®: -2.3%

Overweight 70/30/0

$$\begin{aligned} &(35.4\% \times 70\%) \\ &+ (9.4\% \times 30\%) \\ &+ (-2.3\% \times 0\%) \\ &= 27.6\% \end{aligned}$$

Apply Cap or Floor

$$9.5\% \text{ (Current) or } 0\% = 9.5\%$$

Add Guaranteed bonus

$$9.5\% \times 1.15 = 10.9\%$$

What are the benefits of diversification and overweighting?

We know optimizing performance means choosing the best index. Historically, there hasn't been one clear and consistent winner. With overweighting, no matter who comes in first, the best performer gets most of the crediting.

All Index Interest Accounts have Segments. Segments are credited monthly with the Index Interest Account Guaranteed Interest Rate. The remainder of the interest credited is determined at the end of each Segment Term. For the capped funds, the growth rate is then multiplied by the Segment's Participation Rate and capped at the Segment's Growth Cap. For the uncapped funds, the growth rate is multiplied by the Segments Participation Rate then minus the Index Spread Rate. The final interest crediting rate is this calculated amount minus the Index Interest Account Guaranteed Interest Rate. Participation Rates, Growth Caps, and Index Spread Rate are determined by the Company, but they cannot be less than the amounts guaranteed in the Policy's contract.
